Q2 - Next, a short explanation about how CO2 warming works. Please listen to one of the five videos below. They range from 52 seconds to 5 minutes in length.

Answer	%	Count
52 second video	70.97%	22
1.2 minute video	9.68%	3
3 minute video	6.45%	2
4 minute video	6.45%	2
5 minute video	6.45%	2
Total	100%	31

Q8 - CO2 is a greenhouse gas.

Answer	%	Count
True	0.00%	0
Neither true nor false	0.00%	0
False	0.00%	0
Total	100%	0

Q9 - Greenhouse gases partly retain the earth's heat radiation.

Answer	%	Count
True	0.00%	0
Neither true nor false	0.00%	0
False	0.00%	0
Total	100%	0

Q10 - The greenhouse effect is a natural process.

Answer	%	Count
True	0.00%	0
Neither true nor false	0.00%	0
False	0.00%	0
Total	100%	0

Q11 - Infrared light is absorbed by greenhouse gases (carbon dioxide and methane) and causes the atmosphere to retain heat.

Answer	%	Count
True	0.00%	0
Neither true nor false	0.00%	0
False	0.00%	0
Total	100%	0

Q12 - Infrared light is leaving Earth more slowly as people produce more greenhouse gases. T

Answer	%	Count
True	14.29%	1
Neither true nor false	85.71%	6
False	0.00%	0
Total	100%	7
